

Variety: CDC 1142 Experimental Number: 1142-16

Kind: FABABEAN

Variants:

Additional Information:

---

### Agronomic Traits

Lodging resistance fair to good

### Chemical Characteristics

Seed tannin content absent

### Flower Traits

Flower ground colour white

Flower length medium

Standard anthocyanin colouration absent

Standard melanin spot absent

Time to flowering 60 days

Wing melanin spot absent

Wing petal colour uniformly white

### Leaf Traits

Leaf length medium

Leaf width medium

### Plant Traits

Plant growth habit erect

Plant growth type indeterminate

Plant height at maturity (cm) 106

Time to maturity 126 days

### Pod Traits

Number of seeds per pod 4

Pod attitude semi-erect

Pod colour at maturity dark (brown/black)

Pod width medium

### Quality Characteristics

Protein content (%) 26.6

### Seed Traits

Hilum colour colourless

Seed colour grey beige

Seed weight (g/ 100 seeds) 35.1

### Stem Traits

Nectarie colour on nodal bracts white

No. nodes to first flower medium to many

Stem anthocyanin colouration absent or very weak
